

ARAZZINNI
MAKE A STATEMENT

OUR PHILOSOPHY

We make a statement with every aspect of our manufacturing operations and product line. Excellence in craftsmanship, innovative technologies, and customization is at the core of our philosophy. We use the best available materials to develop durable and beautiful interior and exterior doors. The production line is inspected to exceed industry standards to ensure excellence. These achievements in the door industry set us apart from our competitors. We stand by our products and guarantee customer satisfaction. Join the Arazzinni family and make a statement in your home with new European doors.

REPUTATION

We have gained over five years of experience in the US market. Customer feedback and reviews continue to affirm satisfaction with the quality and design of our doors. Using the best materials to construct our doors and Italian hardware to accompany our designs creates a unique blend of modern sophistication.

ARAZZINNI COLLECTIONS

ARAZZINNI SMART PRO™ LINE

Technologically Advanced Interior Doors combining Sleek Modern Design with an Eye for Perfection. Smart Pro™ thinks of everything; perfection in insulation, moisture resistance, dust movement, dent prevention & much more - All with a modern visual appeal that will last forever.

Sound Insulation

5 year warranty

SmartPreHung™

SmartCore™

FULL LOUVER MODEL
Polar White/ Solid Alder

8

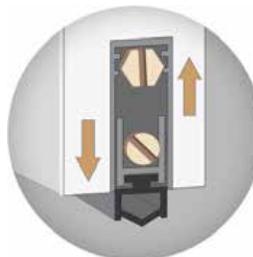

this door model made from a solid alder wood

FEATURES

SmartCore™

Doors are made from solid pine with SmartCore(tm) filling. This benefit allows to significantly increase sound and thermal insulation in comparison to other doors.

SmartSweep™

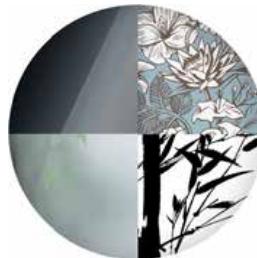

SmartSweep(tm)
Automatic noise and debris protection system.
SmartSweep(tm) is installed at the bottom of the door to protect the room from noise, dust, drafts, smoke and insects. Upon closing SmartSweep(tm) mechanism is triggered by a switch at the door's hinge side, it activates the rubber slide to drop down.

Designed and manufactured in Italy.

Aluminum Stripes

Modern design aluminum strip option is available. Strips are made from real aluminum and provide wide variety of placement combination to choose from to suit your design desires. Modern aluminum or plastic materials are available for you to choose from.

Glass Options

Tempered glass is used to offer glass inlay designs that follow safety regulatory guidelines. Options include Frosted, Clear, Black Bronze, and Full Color Graphic Printing. Designed in Belgium.

SmartEdge™

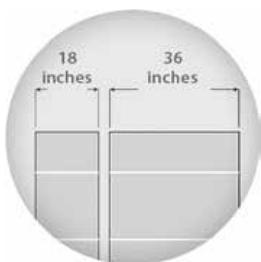

SmartEdge(tm) ensures protection of the most vulnerable part of the door. Edge protection comes from German 1/2mm thick eco-friendly PVC strip that is applied to the edges of the door. SmartEdge(tm) is manufactured and designed in Germany.

Frames and Moldings

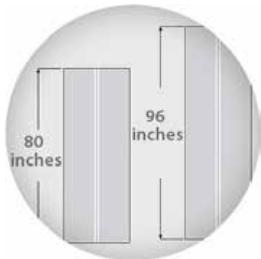

The jambs and casings are composed of 3-1/2" width molding with adjustable jambs from 3 13/32" to 6". The double rubber seal at the joint provides silent closing and optimal insulation.

FEATURES

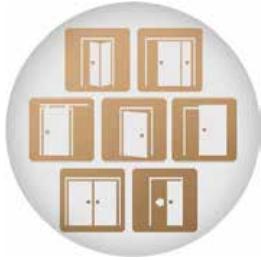

Door Width Range

All standard American sizes are available. Custom width ranges anywhere between 18 and 46 inches.

Door Height Range

Standard Height sizes are available for 6'8", 7' and 8'. Options are almost limitless for the custom height range. Height can reach 100 inches.

Door Configurations

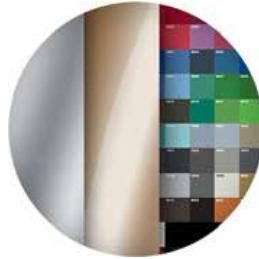

Doors can come in the following configurations:

- 1.Swinging: Single and Double
- 2.Pocket: Single and Double
- 3.Bifold
- 4.Barn, Sliding, Magic

3 Types of Gloss Level

3 Types of Gloss Level
Matte 20° (Standard)
Semi Gloss 50° (Upgrade)
High Gloss 90° (Upgrade)

Premium Lux Lacquered Finish

Premium Lux Italian Lacquer finish is characterized by perfectly smooth matte or high gloss durable coating. Premium Polar White Matte Finish is standard for our SmartPro collection.
Custom Finish Options Available In Any RAL Color.

Magnetic Lock And Concealed Hinges

Thanks to the symmetric milling, the hinge is reversible and allows to choose the door swing directly on site. Magnetic movement lock particularly suitable for lean-look, modern design internal doors.
Manufactured and designed in Italy.

FEATURES

Exotic Wood Veneer

While being made from regular wood (pine) these doors are covered by thin layer made from exotic wood veneer like Wenge, Sapele, Black Apricot etc. Additional layer of Becker Acroma (The Sherwin-Williams Company) coatings gives the surface finished look and protects it from wear and tear.

Innovative Frame Structure

1. Adjustable matching jamb and casings.
2. Rubber seal
- a. Soft closing
- b. Noise reduction
- c. Door slab and jamb protection when closing

Trendy Stripes Design

Modern design aluminum strip option is available. Strips are made from real aluminum and provide wide variety of placement combination to choose from to suit your design desires. Modern aluminum or plastic materials are available for you to choose from.

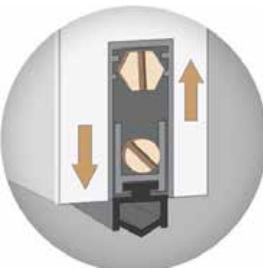

Magnetic Lock And Concealed Hinges

Thanks to the symmetric milling, the hinge is reversible and allows to choose the door swing directly on site. Magnetic movement lock particularly suitable for lean-look, modern design internal doors. Manufactured and designed in Italy.

Tempered Glass

Safety First. We use tempered glass inlays in our glass models that follow safety guidelines.

SmartSweep

SmartSweep(tm)
Automatic noise and debris protection system. SmartSweep(tm) is installed at the bottom of the door to protect the room from noise, dust, drafts, smoke and insects. Upon closing SmartSweep(tm) mechanism is triggered by a switch at the door's hinge side, it activates the rubber slide to drop down.
Designed and manufactured in Italy.

MASSELLO DI ROVERE

ARAZZINNI is proud to introduce Massello Di Rovere hardwood collection. Hand crafted masterpieces from the finest oak trees will surely add character to any home. Massello Di Rovere consist of EGO and QUADRO sub divisions that are distinct in their featured design elements.

EGO

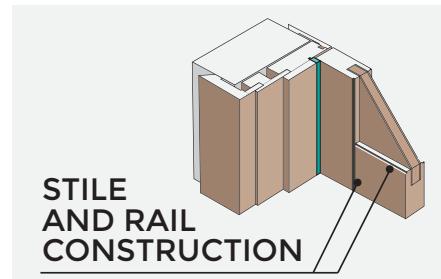

3D EFFECT

EGO Collections offers a 3D Effects via Stained Glass Filler and Hardwood Oak inlays.

Choose from 3 possible combination:

1. Combo- hardwood oak inlay with decorative glass strip.
2. Glass - full glass panel with Stained Glass Filler, which gives the glass a 3D effect. Technique of stained glass filler is an elegant and a bold feature to acid etched glass.
3. Solid- recessed hardwood oak inlay gives character and depth to the oak panel.

**STILE
AND RAIL
CONSTRUCTION**

BEVEL EDGES

A unique touch to the EGO collection are the beveled edges on the Stile and Rail.

QUADRO

ALUMINIUM STRIPES

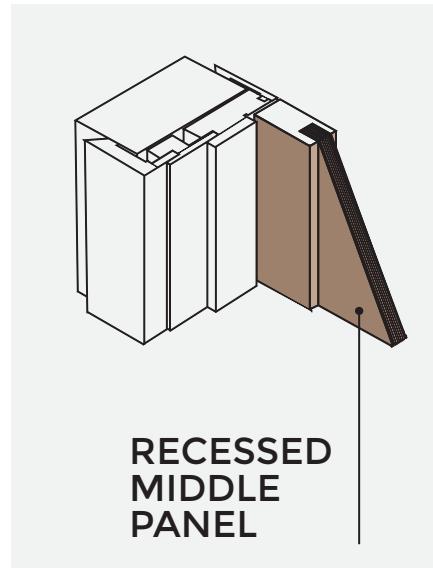

Strips are made from real aluminum and there are different placements combinations to choose from to suit your design desires.

TWO GLASS OR FULL GLASS PANEL OPTIONS

Choice of

- Black Tinted Glass
- White Laminated Glass
- Acid Etched Glass
- Clear Glass
- Silver Strips on the Glass

RECESSED MIDDLE PANEL

FEATURES

AGB Italian Magnetic Lock

Magnetic movement lock particularly suitable for lean-look, modern design internal doors. Italian Magnetic Lock is remarkably quiet on closing and precise in its mechanical coupling, conveying pleasurable sensations on handle and key movement.

Italian Concealed Hinges

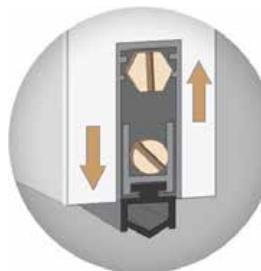

OTLAV Italian Concealed Hinges for modern and designed flush doors. Otlav offers wide settings on three axes hinges. Thanks to the symmetric milling, the hinge is reversible and allows to choose the door swing directly on site. The sash movement is fluid and precise. The covers conceal the adjustment screws, for elegance also when the sash is open.

Finish Options

Custom Finish program. With our Custom Finish option we offer a flexible array of options to suit any design desire. With the use of our laboratory, we can match any oak finish! Its as simple 3 step process of sending us an oak sample, getting a sample back and confirming the finish.

1. Distressed wood imitation
2. Paste Wood Filler
3. Brushed Finish

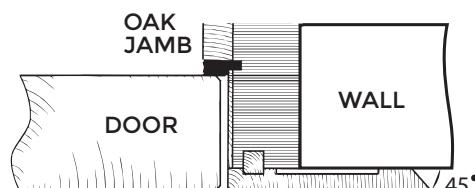

SmartSweep™

Automatic noise and debris protection system. SmartSweep(tm) is installed at the bottom of the door to protect the room from noise, dust, drafts, smoke and insects. Upon closing SmartSweep(tm) mechanism is triggered by a switch at the door's hinge side, it activates the rubber slide to drop down. Designed and manufactured in Italy.

Modern Door Casings Design

1. EGO & Quadro Collections are complimented with an intriguing 45 degree beveled 3 1/4" hardwood oak casings
2. Casings are flush with the door slab. this feature is following to the latest trends in door design and adds smooth and clear look of the doors

HIGH ENDURANCE COLLECTION

This collection features high durability door finish, thanks to innovative composite materials. All backed up by sturdy construction of the door slab and parts. Extra layer of endurance is added by aluminum edges made from forged aluminum. Say commercial grade for home use. If you need a sound resistance door with extra durability this door model is the best choice. All flush design doors has a solid wood core also available sound resistance core by buyer request as option.

HIGH ENDURANCE COLLECTION

Pure inspiration of geometric combination of wooden and glass lines make this door main focal point of your interior design. Different placements and color variations makes it easy to achieve unique design goals.

Beside having solid wood structure, this door is reinforced by anodized aluminum edges. Moisture and scratch resistant finish makes it best to use for spaces like medical facilities and public spaces.

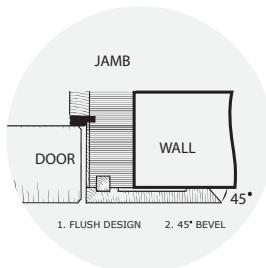

Vertical style with horizontal beveled rails give these doors stable and warp-resistant structure. Tempered glass inlays make Mirella Vetro doors a lightweight look.

FEATURES

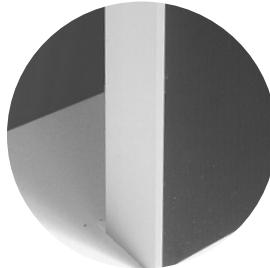

Magnetic Lock and Concealed Hinges

Thanks to the symmetric milling, the hinge is reversible and allows to choose the door swing directly on site. Magnetic movement lock particularly suitable for lean-look, modern design internal doors. Manufactured and designed in Italy. 

Modern Door Casings Design

1. This Collection complimented with an intriguing 45 degree beveled 3 ¼" hardwood oak casings
2. Casings are flush with the door slab. this feature is following to the latest trends in door design and adds smooth and clear look of the doors

Aluminum Slab Edges

Made from forged aluminum this design element ensures protection of the most vulnerable part of the door. All models with the exception of Matrix and Mirella have aluminum edge and can be equipped only with concealed hinges and magnetic locks.

High Durability Finish

Solid wood base is wrapped by thin polypropylene film which is extremely scratch resistant and replicates natural wood grain look. With a choice of rich wooden tones.

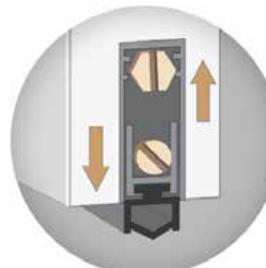

Solid Wood Core

Carefully selected pine wood composited into sturdy and strong board. Innovative technology prevents it warping, curving and swelling.

SmartCore™

High Endurance collection is available with sound suppressing SmartCore(tm) upon the customers request.

Smart Sweep™

Automatic noise and debris protection system. SmartSweep(tm) is installed at the bottom of the door to protect the room from noise, dust, drafts, smoke and insects. Upon closing SmartSweep(tm) mechanism is triggered by a switch at the door's hinge side, it activates the rubber slide to drop down. Designed and manufactured in Italy.

MODERN EXTERIOR DOORS

The Pirnar door is a handmade masterpiece, perfectly shaped and flawlessly crafted in every detail. They are the fruit of bold planning, inspiring design and imaginative realization. Love for perfection is shown in the selection of costly materials, the precision of production, the flawlessness of surfaces and the elegance of lines. Every detail has its own place, and its own special meaning. The abundance of the handcraftsmanship makes possible what no machine can.

High safety level

German Design Award

FEATURES

Thick Door Panel

The door panel, because of its thickness and special construction, is exceptionally rigid and firm. This is enhanced by a combination of the thickest profiles by the company Schüco. All the doors can be built for the anti-burglary protection class RC2 (WK2).

Adaptive

You can have your choice of dimension, your choice style and any of the dozens of designs within that style. You can have your choice of any colour and surface treatment. With discreet LED lighting, your door can shine also at night, not only in the sun.

Innovative

Pirnar's was the first to develop a multi-level design for an aluminium door panel. They were the first to use a 4-layer glazing that brought with it new aesthetic possibilities. Quadruple sealing is also an innovation of theirs, further adding to better insulation.

Experienced Artisans

Is it possible to make a door with thermal conductivity beyond reach by now, a multiple level door panel or an entrance with all the elements evened into one surface? We achieve the goal no matter if it is necessary to use high technology or craftsman hands.

Outstanding Design

Doors seize the attention with their different surface levels as well as with their astonishingly clean and perfect smoothness. Every handle is a masterpiece of its own, at night arousing more sighs of admiration as it lights up. The fourfold glazing offers the possibility for endless play with patterns and textures

Comfort

You take care of the safety of your home with a single touch of your fingerprint. Comfort is a friendly and discrete lighting of the entrance where it is most needed. At night, it is easy to spot a doorstep, hold a handle, or see where to put your finger to unlock the door.

LACQUERED FINISH OPTIONS

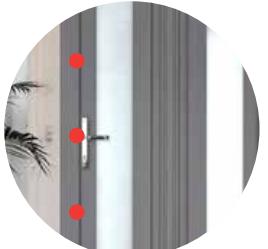

FEATURES

Custom Design options

If you are a designer or a person who just wants to have a front door made based on your ideas, the solid oak entry doors collection is for you. This collection allows you to create custom designed doors with placement combinations of glass inlays, flat and 3D panels, decorative aluminum moldings, and various types of stains. For implementing custom designs contact us and discuss some aspects of your project.

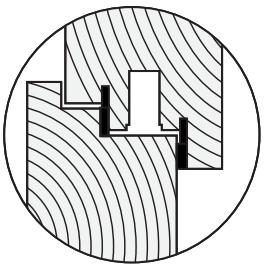

Safety

Base thickness of all doors from this collection is 2-¾". We use fine hardwood oak, that is very durable and strong among other available wood species. With German engineered 3-point Locking system from FUHR, we can guarantee you a durable, secure and trustworthy locking system.

Finish

The finish on an exterior door is always under stressful conditions such as temperature changes, water influence and direct sunlight. Therefore, we use an eco-friendly, waterborne coating to give them the best protection ever. Based on lab tests and real life usage, we guarantee 10 years of service life for opaque shades and 5 years for transparent shades.

Weatherproof

Since these are exterior doors, every unit is equipped with double-layered compression weather stripping, which adds extra protection from drafts and dust. No need in extra expenses for a storm door.

MODERN ITALIAN LOCKS

MAGNETIC LOCK

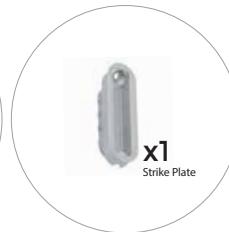

Magnetic movement lock particularly suitable for lean-look, modern design internal doors. Peerlessly versatile, thanks to design of innovative strikers which can be used for rebated and flush doors, with wooden or aluminum frames. Modern Italian Lock is remarkably quiet on closing and precise in its mechanical coupling, conveying pleasurable sensations on handle and key movement.

POCKET DOOR LOCK

Insertion lock for internal sliding doors. Since it is simple to install, and given the considerable hook-striker tolerance, Modern Italian Lock guarantees perfect locking in all situations. Italian Lock is a pleasingly smooth operating handle and key system. The head of the hook features a patented bit which acts as jig to mark on the jamb the center of the notch for housing the striker. Modern Italian Lock is provided in kit form including catches with handles and finger pull.

FLUSH BOLT

MAGNETIC DOOR CATCH

ITALIAN SOFT CLOSING AND SELF CLOSING POCKET SYSTEM

SOFT CLOSING OPTION

Just slide the door towards its closed position and at a certain point the door takes over and softly closes itself. It really is as simple as that! Useful, easy and increased safety from trapped fingers, once you used it there is no substitute. Can be installed retrospectively on existing systems.

Available in 3 versions:

1. Self-closing system
2. For door panels up to 40 kg
3. For door panels heavier than 40 kg.

SELF CLOSING OPTION

Once opened the door closes itself automatically. It is a mechanical system that can be easily installed on any Soft Closing Option in a mere 5 additional minutes.

- Adjustable closing door speed
(no need to remove door or jambs)
- It is invisible from the outside
- Maximum drag 40 kg.

MAGIC SYSTEM

The new invisible wood sliding system outside the wall completely hides the hardware with the door opened or closed. It creates the look of seamless glide on the wall surface. A patented product that guarantees functionality and aesthetic renovation. With high aesthetic value, easy maintenance, quality of every single detail Magic System has an ability to be a market winner. This is a high performance sliding system with braking dampers that allow soft opening and closing. Completely invisible Magic System available for door width anywhere between 32" - 42".

No upper tracks on the wall

No lower track on the floor

FRAMELESS DOOR SYSTEM AND MAGNETIC HIDDEN LOCK

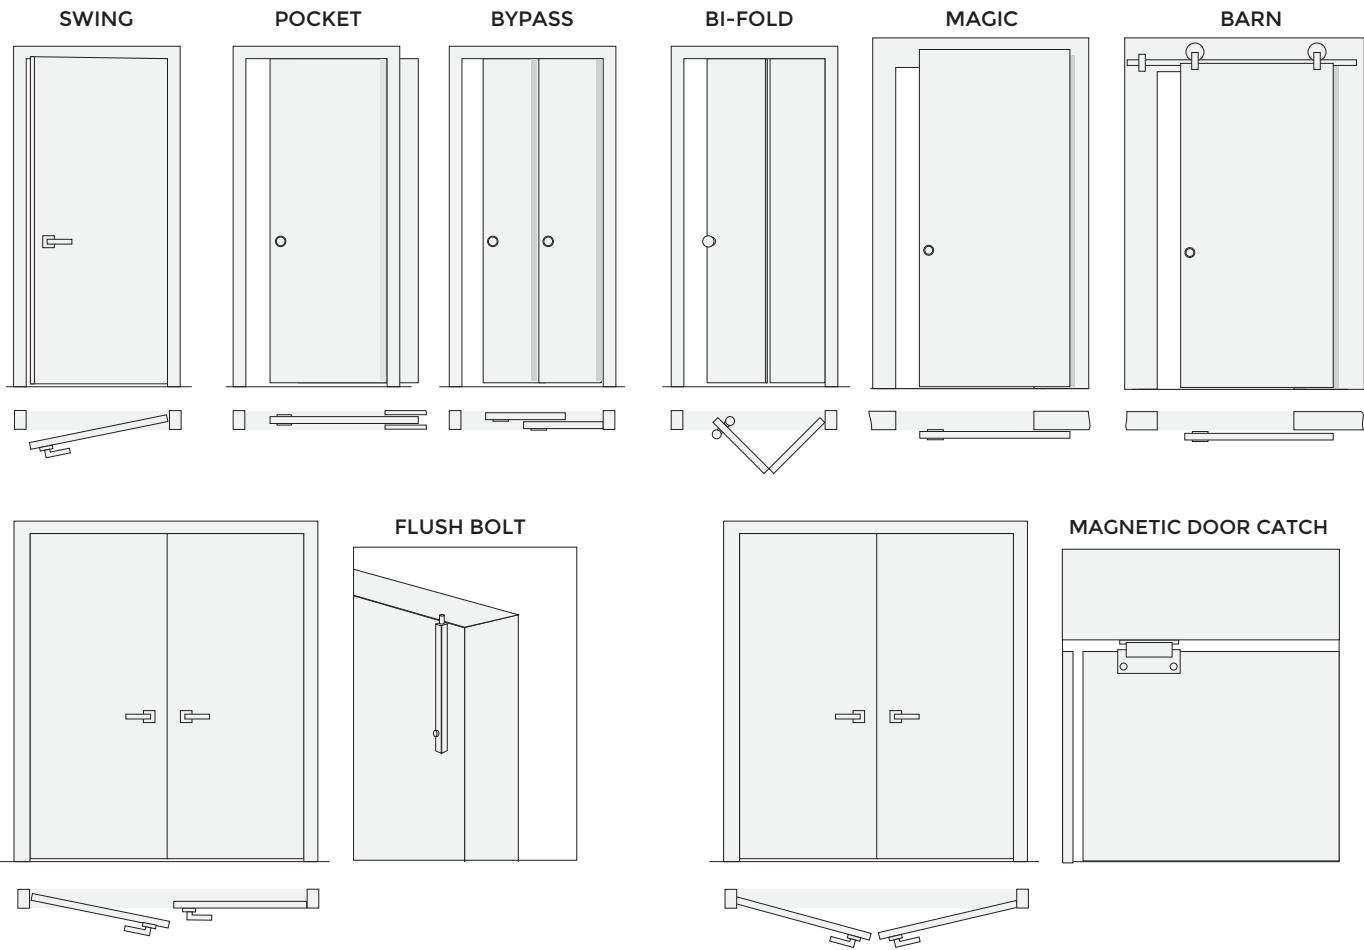

Syntesis Swing Line ® is the solution that allows you to install a hinged door flush to the wall, which is devoid of any element such as picture frames and jambs architraves. Depending on your taste, the doors can be painted in the same color as the wall to hide from the view. Perfectly reaching the most seamless blend with the wall available to our technology. Alternatively all our door panels can be lacquered or veneered to become a true design element.

Handle free solution that operates by pushing of the hidden flap, which releases the magnetic latch. The handle is completely smooth and flush with the door leaf that operates silently thanks to the magnetic locking mechanism.
